NOTES TO THE INTERIM SEPARATE FINANCIAL STATEMENTS FOR QUARTER II-2022  
(continued)As at 30<sup>th</sup> June 2022**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES** *(continued)***3.2 Inventories** *(continued)**Provision for obsolete inventories*

An inventory provision is created for the estimated loss arising due to the impairment of value (through diminution, damage, obsolescence, etc.) of inventories owned by the Company, based on appropriate evidence of impairment available at the balance sheet date.

Increases or decreases to the provision balance are recorded into the cost of goods sold account in the interim separate income statement.

*Inventory property*

Property acquired or being constructed for sale in the ordinary course of business, rather than to be held for rental or capital appreciation, is held as inventory property and is measured at the lower cost incurred in bringing each product to its present location and condition, and net realizable value.

Cost includes:

- Freehold and leasehold rights for land;
- Amounts paid to contractors for construction; and
- Borrowing costs, planning and design costs, costs of site preparation, professional fees for legal services, property transfer taxes, construction overheads and other related costs.

Net realizable value is the estimated selling price in the ordinary course of the business, based on market prices at the ending date of the accounting period and discounted for the time value of money (if material), less costs to completion and the estimated costs of sale.

The cost of inventory property recognized in the interim separate income statement is determined with reference to the specific costs incurred on the property sold and an allocation of any non-specific costs based on the relative size of the property sold.

**3.3 Receivables**

Receivables are presented in the interim separate financial statements at the carrying amounts due from customers and other debtors, after provision for doubtful debts.

The provision for doubtful debts represents amounts of outstanding receivables at the end of the accounting period which are doubtful of being recovered. Increases or decreases to the provision balance are recorded as general and administration expense in the interim separate income statement.

**3.4 Fixed assets**

Tangible fixed assets and intangible fixed assets are stated at historical cost less accumulated depreciation and amortization.

The cost of a fixed asset comprises its purchase price and any directly attributable costs of bringing the fixed asset to working condition for its intended use.

Expenditures for additions, improvements and renewals are added to the carrying amount of the assets while expenditures for maintenance and repairs are charged to the interim separate income statement as incurred.

When fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the interim separate income statement.

**3.5 Leased assets**

The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement at inception date and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset.

*[NOTICE: This document is a translation of the Vietnamese language original for convenience purposes only, and in the event of any discrepancy, the Vietnamese language original shall prevail.]*

Investment properties are stated at cost including transaction costs less accumulated depreciation.

Subsequent expenditure relating to an investment property that has already been recognized is added to the net book value of the investment property when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing investment property, will flow to the Company.

Depreciation of investment properties is calculated on a straight-line basis over the estimated useful life of each asset as follows:

Buildings and structures	25 - 48 years
--------------------------	---------------

Land use rights with indefinite useful life are not amortised.

Investment properties are derecognized when either they have been disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. The corporate income tax ("CIT") rate applicable to the Company and its subsidiaries is 20% of taxable profits.

The tax returns filed by the Company are subject to examination by the tax authorities. As the application of tax laws and regulations is susceptible to varying interpretations, the amounts reported in the interim separate financial statements could change at a later date upon final determination by the tax authorities.

**Current corporate income tax**
